QuickDry & Airflow system

Our Cane-line QuickDry & Airflow system offers cushions with our special QuickDryFoam®. The unique cushion composition with QuickDryFoam® ensures a quick drainage after heavy rain and an effective air circulation in humid weather conditions. The benefit is dry cushions approximately one hour after heavy rain and no risk of mould building inside the cushions due to the constant air circulation.

We recommend to store cushions indoors in a ventilated room or in one of our cushion boxes during winter season or when not in use for a longer period.

For more information regarding maintenance and cleaning: www.cane-line.com.

All series with the QuickDry & Airflow system logo are delivered with QuickDryFoam®. All other cushions are delivered with our high quality Cane-line foam (cold foam).

Cushion composition

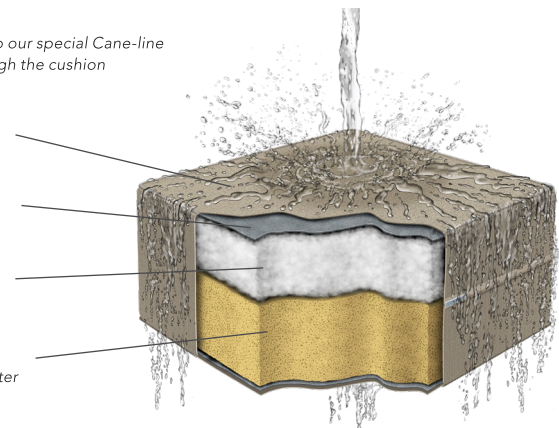

90% of rainwater is repelled due to our special Cane-line fabrics and only 10% passes through the cushion

Outer cover/fabric
adds a nice and smooth surface

Inner cover/rain cover
protects the rain from ingressing

Padding
adds comfortability for seating

QuickDryFoam®
secures a quick draining of the water and air flow for humidity

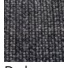

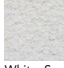

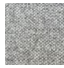

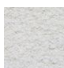

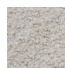

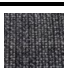

Approximately one hour after rainshowers your cushions are dry, and you can sit comfortable in your furniture again

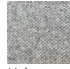

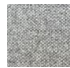

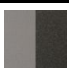

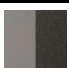

When raining, place the cushions in an upright position so the water can drain.
